General Help

As you type a letter on your keyboard, you create a 3D object you can move, rotate resize on the 3 axes

You can also select a symbol, figure or shape from the symbol menu to create object such as :

- symbols : ? @ & !
- figures : 0 1 2 3 4 5 6 7 8 9
- shape : cube cone sphere

Menu Design

In this menu you can open and save a 3DL file or export a design as a jpg.

New	to create a new design
Open	to open a design
Save	to save a design
	to export a design as a photo - jpg file

Save, Open and Export functions are not available on the webplayer (try it page) but on the download version (Mac or Windows)

Menu Format

In this menu you can Move Rotate Resize a letter relative to x, y or z axes

To Move, Rotate or Resize a letter:

- 1/ Select the letter to format
